

GLYTONE

EXCLUSIVE TO PHYSICIANS

“ I always had oily skin and nothing seemed to work. I started using the Glytone Acne Treatment Kit and it dramatically reduced the size and redness of my blemishes. My days of searching for the right acne products are over. ”

Laurie - Laurie, Radnor, PA

“ At the age of 29, I found myself struggling with back acne. At the recommendation of Dr. Patel, from The Institute for Advanced Skincare, I tried Glytone's in-office salicylic acid peels and the Acne Back Spray. After two treatments, the complexion of my back has dramatically improved. ”

Kelly - Kelly, Ardmore, PA

A SIMPLE SOLUTION FOR ACNE

Proven ingredients to help control acne

GLYTONE

EXCLUSIVE TO PHYSICIANS

ACNE

Are you one of the millions of people who suffer from Acne?

60 million people in the US are estimated to have acne. While it's widely thought that acne is a problem mostly affecting teenagers, adult acne is just as common.

Discover the physician recommended solution

Sorting through the countless acne products can be frustrating. Don't feel singled out. Many of these products contain low levels of active ingredients that do not impact the skin. Treating acne is a daily longterm process that includes a good skin care regimen, recommended by your physician.

Glytone has developed a physician recommend simple 3-step solution that delivers clear and healthy skin effectively for both teenage and adult skin. This regimen takes the guesswork out of treating acne and can be used in conjunction with most acne treatment options.

Are you seeing the signs?

Acne (acne vulgaris) is a skin disorder characterized by whiteheads (closed comedones), blackheads (open comedones) and pimples (papules). It most often affects the face, but may also appear on the neck, shoulder, chest and back. Acne begins with hair follicles, which contain oil-secreting (sebaceous) glands. Overactive oil-producing glands, which contribute to clogged pores, as well as genetic and hormonal factors, play a role in development of acne.

Simple 3-Step Acne Kit

A daily regimen that combines proven acne fighting ingredients to control acne. Can be used alone or in combination with prescription products.

Back Acne

A daily treatment for back acne with a unique upside down pump for ease of application. Can be used alone or as a maintenance to our in office Glytone Salicylic Acid Peel for the back and chest.
